JOIN THE MOVEMENT:

You are invited to Food & Bio Global Summit '23 Aarhus, Denmark, 26-27 September

The agenda is clear. The current food systems must change, and the world's leading industry must work together with science to develop transition pathways to new sustainable ecosystems. Business models and value chains must be transformed and require concrete and doable plans. We need to join forces and work together if we want to globally accelerate the transition of the food system to sustainability. We want to start a movement!

Clusters are key drivers to accelerate innovation and collaboration for more sustainable and healthy food systems and smart use of bioresources. But we need to speed up even more. We can do this by strengthening our collaboration, sharing new solutions and boosting our focus on real impact towards carbon net zero food production by 2050.

Food & Bio Global Summit '23

Food & Bio Cluster Denmark is taking the initiative to organise a two-day global summit to gather leading global clusters and their members being companies, universities, and other relevant stakeholders to discuss, get inspired, connect, interact, and face the challenges in the food and bioresource industry. In collaboration with the Summit Partners and sponsors, we would like to invite you to be part of this first Food & Bio Global Summit.

Besides several inspiring and high-level key-note speakers, business and cluster success cases and panel discussion, we are facilitating four Summit Labs in which you can take active part, and later participate in one-to-one matchmaking meetings:

The four Summit Lab topics:

- Positive Plant-based Nutrition
- Technologies to Maximizing Biomass Production for Multiuse Purposes
- Circular Green Transition
- Radical New Food Production Systems

Why participate?

- Get an insight into the global challenges and trends in the food and bioresource industry
- Be part of the sustainable solutions to the global challenges in the food and bioresource industry
- Learn about the power of collaboration and acceleration by boosting collaboration opportunities
- Network and meet new and existing collaboration partners
- Build sustainable relations and collaboration with partners from all over the world

Join the movement!
Register today at www.foodbioglobal.com

We are looking forward to meeting you at the first
Food & Bio Global Summit!
